of Correction**

Commissioner for Patents  
P.O. Box 1450  
Alexandria, VA 22313-1450

Re: Patent No. 6,782,346 B2  
Issued: 8/24/04  
Inventor: Bond et al  
For: Aircraft Synthesis and Systems Evaluation Method  
for Determining and Evaluating Electrical Power Generation  
and Distribution System Components  
Our reference: 7784-000260

Sir:

We have noted in proofreading Patent No. 6,782,346 B2 the following errors which appear to require a Certificate of Correction:

Column 1, line 37 (application page 1, line 14) delete second occurrence of "aircraft".

Column 15, line 32, claim 6 (amendment dated December 11, 2003, page 6, line 17, claim 14)

Delete -- an architecture module, for sizing said components of said EPGDS and displaying information relating thereto on a said display screen; and --

Insert the following two paragraphs after the first paragraph of claim 6:

"an architecture module responsive to information input to said airplane parameters module for determining specific components for said EPGDS and for displaying said specific components on said display screen; and

a generation module responsive to information generated by said loads and architecture modules, for sizing said components of said EPGDS and displaying information relating thereto on said display screen; and"

It appears that the deleted paragraph was inadvertently inserted into the issued patent by the U.S. Patent and Trademark Office, and therefore we feel there is no fee involved in this matter.

## UNITED STATES PATENT AND TRADEMARK OFFICE

### CERTIFICATE OF CORRECTION

PATENT NO : 6,782,346

DATED : 8/24/04

INVENTOR(S) : Bond et al

It is certified that error appears in the above-identified patent and that said Letters Patent are hereby corrected as shown below:

Column 1, line 37 (application page 1, line 14) delete second occurrence of "aircraft".

Column 15, line 32, claim 6 (amendment dated December 11, 2003, page 6, line 17, claim 14)

Delete -- an architecture module, for sizing said components of said EPGDS and displaying information relating thereto on a said display screen; and --

Insert the following two paragraphs after the first paragraph of claim 6:

"an architecture module responsive to information input to said airplane parameters module for determining specific components for said EPGDS and for displaying said specific components on said display screen; and

a generation module responsive to informaton generated by said loads and architecture modules, for sizing said components of said EPGDS and displaying information relating thereto on said display screen; and"
